

ACCUDOCK™ DOCK OF THE MONTH

Month: October 2012
Location: New Jersey
Event/Club: Commercial

AccuDock™ took on the challenge of creating a custom bridge solution for workers to access both sides of a tidal waterway in New Jersey. During low tides, the waterway would essentially dry up, presenting the problem of a floating dock bottoming out. Hinges were incorporated between every float section to allow the dock to take to the contour of the landscape. Our New England dealer, Custom Float Services helped assist with this unique project.
